

Windermere marries traditional design with modern sophistication, evident through the unique introduction of a crisp oval extrusion replacing over-embellished castings.

This collection has redefined the very image of a park bench, merging the nostalgia of the past with modern manufacturing processes of today.

Shown to the left are the B410 B-SS-72 bench and R410-27B-AL waste receptacle. Shown below are the SLR-27-WA Endure waste receptacle and the B410 B-ALS-72 bench.

Windermere

The Windermere bench is beautifully designed to offer a modern interpretation of the classic park bench. This collection will complement transitional to traditional environments through its original style and gracious elegance. Available in both metal and poly slats, Windermere provides maximum flexibility by adapting to the needs of every environment.

This collection is one of a kind. Designed with a simple contour for comfort and support, the bench becomes a relaxing element in any public setting. With a wide array of finish combinations, the Windermere Collection is well suited for corporate campuses, shopping malls, academic institutions, parks and gardens.

Pictured on the cover is the B410 B-SS-72 bench.

(Top) B410 A-SS-72 with center arm.
(Bottom) B410 B-ALS-72 bench.

RPI offers many color combinations, including 30 powder coat finishes and 6 poly slat finishes, providing clients with a wide range of color combinations. Shown above is the B410 A-ALS-72 bench.

Windermere Bench

Furnishings
for
Public
Spaces

The Windermere bench is offered in an all steel or steel/poly combination. The simple oval extruded section provides a good fit for body contour without sharp edges. The seat/back profile is designed to fit a wide range of people for a long-term relaxed sitting position in public spaces. Windermere is tough, well built, and weatherproof, perfect for outdoor use.

The bench is 72" long with or without a back. The frame is constructed of 16 gauge 3/4" x 2" oval-shaped steel tubing. Steel center arms are also available. All steel is e-coated and powder coated. All hardware is stainless steel.

The slats are either 3/16" x 2" solid steel bar or 1.2" x 2.5" racetrack-shaped poly slats formed from 100% post-consumer recycled plastics. The poly slats are UV stabilized to prevent fading, will not rot outdoors, and are resistant to termites. They are available in six colors.

This bench is free-standing, but also capable of being surface anchored with four 5/8" diameter holes suitable for your 1/2" diameter bolts.

The Windermere Collection is manufactured and assembled in the USA.

Specifications		Model	L	D	Overall Height	Seat Height	Approx. Weight	BIFMA Certified
	Steel slat seat, steel legs, no back	B410 A-SS-72	72"	22.25"	24"	16"	105 lbs	✓
