Wave Collection Bench Stainless Steel

Furnishings
for
Public
Spaces

The stainless steel benches are part of the Wave Collection, which includes stainless steel STX waste receptacles and stainless steel planters.

The seat and back feature the unique “wave” design for providing maximum comfort. With the graceful, fluid lines, it is as pleasing to the eye as it is inviting to sit on.

The seat and back are constructed of 14-gauge type 304 stainless steel with a #4 brushed finish. Legs are 4" wide x .375" thick. Closely spaced perforations help protect against the build up of heat in the sun.

Black injection molded rubber feet are standard on these benches to protect floors. The bench may also be ordered with L-shaped aluminum anchor straps or cast steel anchor feet, or with reinforced concrete pedestals cast in an integral color. The stainless steel can be powder coated, if desired, at extra cost.

	Specifications	Model	L	D	H
	Stainless steel seat & legs, no back	B321 A-SS-7222-SS	72"	22.25"	16"
