These heavy duty, 16-gauge and 18-gauge perforated steel waste containers can be used in conjunction with our perforated steel benches. All steel parts are powder coated in a polyester based formulation with excellent light and weathering resistance. When used outdoors an under-coating should be considered. The aluminum tops are hardcoat anodized in dark grey. Standard color for STX-22-WP polyethylene tops is charcoal.

The optional liner sits on the inner lip of the steel body and is provided with hand holes for easy lifting. Trash bag tops can be folded under the liner. Injection molded rubber feet are standard.

All units used for trash are supplied with internal rings to support trash bags, unless optional liner is specified. The 11 and 22 gallon models are also available wall mounted. On the STX 53, 41, and 27 models the use of liners reduces the capacities to 59, 42 and 28 gallons.
