68, 50 and 35 Gallon

These heavy duty, 14-gauge perforated steel waste containers can be used in conjunction with the B320 perforated steel benches. All steel parts are powder coated in a polyester based formulation with excellent light and weathering resistance. When used outdoors an undercoating should be considered. There are three top styles available, either in dark grey, hardcoat anodized aluminum or in fiberglass. Bag holder rings and black injection molded rubber feet are standard.

Polyethylene liners are available as an option. These sit on the inner lip of the steel body and are provided with hand holes for easy lifting. Trash bag tops can be folded under the liner rim. The use of liners reduces the capacities to 59, 42 and 28 gallons respectively.
